

COMPACTCATH, A REVOLUTIONARY CATHETER

CompactCath is a first of its kind compact urinary catheter, designed to fit seamlessly into the lives of active people who self-catheterize.

THE PRODUCT

CompactCath features:

- Compact packaging that fits in your hand
- Pre-lubrication for smooth insertion
- Retractable mechanism allowing easy and discreet disposal
- Flexible funnel for easy aiming
- Non-touch hygiene mechanism for infection protection

THE STORY

Thanks to modern medicine, people with chronic conditions who used to be tied to hospital settings are now leading active, independent lives. However, traditional catheters have been designed for the hospital, and often come in the way of everyday activities.

CompactCath was designed by a multidisciplinary team of physicians, engineers, and MBAs, in cooperation with physicians, nurses and patients. We applied design thinking methodologies and are committed to improving the quality of life of those who need to self-catheterize.

The result is CompactCath, a product that fits to the modern lifestyle of patients. We envision a world where people will no longer have to fear or fight with their medical devices. Time and energy should be spent on the important things in life.

ABOUT US

Alumni of the Stanford StartX-Med accelerator program,

CompactCath was founded in 2011 and is based in Palo Alto, CA.
CompactCath has presented at the Aspen Ideas Festival in 2012, obtained
2 patents in 2013, and expects FDA clearance in the summer of 2014.
